Our diversity allows us to satisfy any requirement from design, fabrication, to finished product, or any combination thereof.

- 16 Guage thru 3" Stainless
- 18 Welding Stations
- Certified Welders

welding

Sandblasting is a term for the process of smoothing, shaping and cleaning a hard surface by forcing solid particles across that surface at high speeds. Sandblasting or abrasive blasting removes mill scale, corrosion (rust), coatings (paint), heat treatment discoloration, weld spatter or other physical defects. As such, blast cleaning is a preparatory step for a product that will be painted, anodized, plated, powder coated, otherwise finished.

- Two Paint booths 16' x 40' & 24' x 48'
- Environmentally friendly, 100% fully recycled dust collection.

coatings

CHEMLINE

Northwest Services, Inc. offers GatorHyde's Rapid Curing, High-Pressure spray-applied protective coating. It provides a versatile, advanced, long lasting and durable elastomeric coating.

Regardless of the application, the complete family of GatorHyde polyurea coating systems, manufactured by CHEMLINE, INC. are designed to provide excellent protection to your Pick-Up, Farm Equipment, Trailer Bed, Container Bottom, Work Truck, or any steel needing solid protection against the onslaught of corrosive salt and chemical attack.

When it comes to sheer performance, abrasion resistance and complete waterproofing, nothing equals GatorHyde Protective Coating systems. GatorHyde is not sensitive to high humidity, or even low temperatures. It can be applied in the most extreme conditions and still cure in seconds not minutes or hours.

GatorHyde coatings are complete monolithic membranes (seamless) therefore eliminating the possibility for a potential seam leak. GatorHyde will NOT peel, flake or chip and because of its unique elastomeric qualities is very resilient upon impact and will not crack like harder coatings will.

Tarping systems for;

- Dump bodies
- Transfer trailers
- Scrap trailers
- Landscaping trucks
- Luggers
- Roll-offs

Northwest Services offers the most complete line of tarping systems and parts in the industry.

Tarps protect the load from the elements. They also protect fellow motorists from objects thrown from loose loads. These common-sense requirements are codified into laws and regulations governing litter or roadway safety in every state.

tarping
